DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 and 18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The limitation “means for determining first and second pause periods” was not described in the specification as originally filed and is therefore new matter. There is no disclosure of a q-switch performing any type of determination. The q-switch is disclosed as merely turning on and off laser oscillation.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9, 18-27, 37, 38, 40, and 41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2815

In regards to claims 1 and 18, the limitation “a Q switch means for determining first and second pause periods” renders the claims indefinite. It is unclear how the Q switch means can perform two separate functions. It is also unclear how a Q switch can determine something. The specification does not describe a q-switch performing a determination operation. A q-switch merely performs the function of turning on and off the laser oscillation. It is suggested the claim limitation be rewritten as follows:

“a Q switch means, [for determining first and second pause periods] located between said output mirror and reflector mirror, for turning on and off a laser oscillation by said output mirror, reflector mirror, and gain medium, said Q switch means [also for] turning on laser oscillation during a [the] first pause period before generation of the laser pulse train, and for turning off the laser oscillation during a second pause period before generation of the laser pulse train”

Allowable Subject Matter

Claims 1-9, 18-27, 37, 38, 40, and 41 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Claims 10-17, 28-36, 39, and 42 allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record, either singularly or in combination, does not disclose or suggest at least an interval

Art Unit: 2815

between the first and second laser pulses is shorter than a sum of the first and second pause periods.

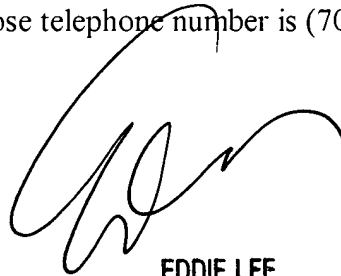

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew C. Landau whose telephone number is (703) 305-4396.
